

"Heavy-Light Chain Pair Identification in Antibodies using BERT (work title)"

MASTER THESIS
FACULTY OF SCIENCE, UNIVERSITY OF BERN

HANDED IN BY
Lea Brönnimann

2024

SUPERVISOR:
Prof. Dr. Thomas Lemmin

Abstract

Contents

1. Introduction	1
1.1. Background	1
1.2. Objectives	1
1.3. Scope of the Topic	1
1.4. Research Question	1
1.5. Nature of the Thesis	1
1.6. Relevance of the Thesis	1
2. Literature Review (work title)	2
2.1. Introduction to Antibodies	2
2.2. Antibody Engineering and Therapeutic Applications	2
2.3. BERT and Transformers in Bioinformatics	2
2.4. Heavy-Light Chain Pair Identification	2
2.4.1. Gap in the Literature	2
2.4.2. Conclusion	2
3. Materials & Methods	3
4. Results	4
5. Discussion	5
6. Conclusion	6
References	7
List of Figures	8
List of Tables	9
A. Appendix	10
A.1. Link to the Code	10
A.2. Declaration of Independence	10

1. Introduction

1.1. Background

1.2. Objectives

1.3. Scope of the Topic

1.4. Research Question

1.5. Nature of the Thesis

1.6. Relevance of the Thesis

2. Literature Review (work title)

2.1. Introduction to Antibodies

2.2. Antibody Engineering and Therapeutic Applications

2.3. BERT and Transformers in Bioinformatics

2.4. Heavy-Light Chain Pair Identification

2.4.1. Gap in the Literature

2.4.2. Conclusion

3. Materials & Methods

4. Results

5. Discussion

6. Conclusion
